SAFE WALL PANELS

DECORATIVE WALL PANELS VIPROK

Since 2005, the VIPROK factory has been producing high-quality panels for interior decoration. The owner of the brand VIPROK is Axioma Mironova.

The mission of our company is to create modern affordable solutions in the market of decorative materials. We help to make rooms of any type more comfortable and safer.

VIPROK - decorative wall panels made of plasterboard, which is industrially laminated on the front side with a high-strength vinyl covering. VIPROK panels are distinguished by precise product geometry and uniform application of the decorative layer, which ensures perfect attachment of the panels during installation/assemblage.

The production of VIPROK GB / MGO panels is carried out on modern aggregate-modular lines of our own design. Strict adherence to the technical process and quality control guarantee the resistance and durability of VIPROK panels.

Distinctive features of materials

Fire resistance

**Environmental
friendliness**

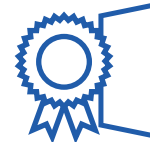

Light fastness

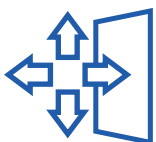

Wear resistance

**Ease
of installation**

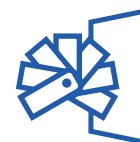

High quality

**Movement
resistance**

**Visual similarity
with expensive
materials**

**Wide range
of textures**

REASONS FOR THE POPULARITY OF VIPROK PANELS IN THE MARKET

Fire safety

VIPROK are ideal panels for interior decoration of premises with high fire safety requirements. All production has the corresponding certificates.

Wear resistance

Resistant to external influences VIPROK panels are ideal as a decorative finish for high-traffic areas. During production a wear-resistant vinyl covering is used dyed over the entire depth of the layer (the weight of the front covering is from 260 to 500 g/m²). This technology makes invisible shallow damage.

Mounting speed

Simple clean installation allows you to complete the finishing work in the shortest possible time. Commercial premises ready for operation can be obtained in a day.

3000 colors and textures

VIPROK panels have a wide range of colors and textures. With VIPROK panels it is easy and economical to get stylish interiors of any complexity.

cafes, restaurants and dining rooms

Hotels and hostels
Hotels of any star rating

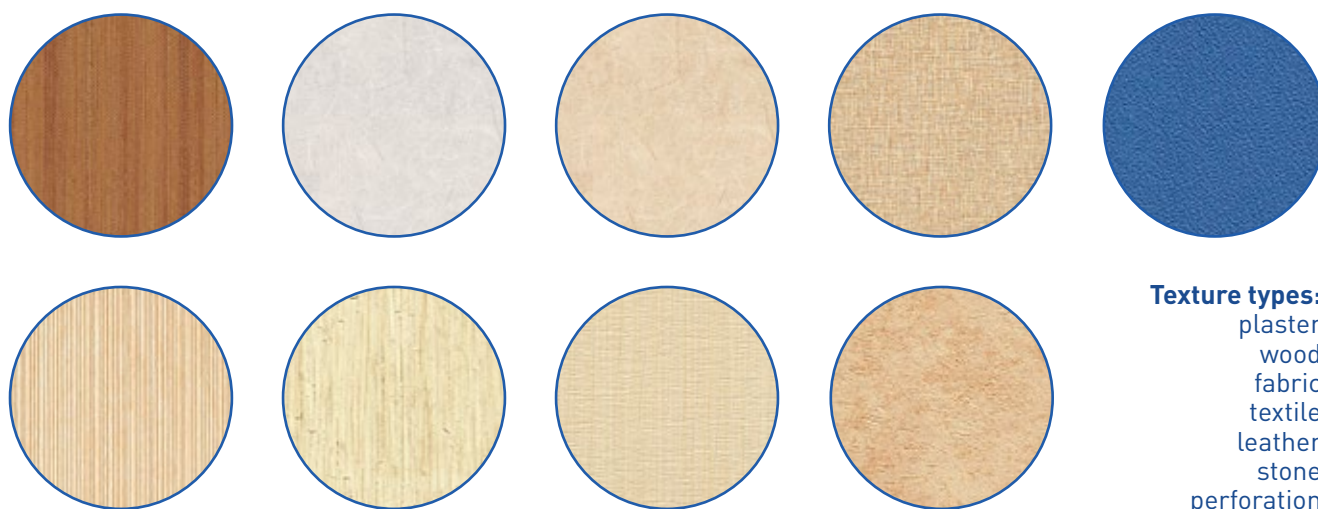

VIPROCK panels have chosen by

VIPROK-VINYL

DESIGN VINYL PANELS

VIPROK-Vinyl - high-strength wall panels for interior decoration based on GB, MGO with wear-resistant Newmor vinyl covering (Great Britain).

VIPROK-Vinyl panels with anti-vandal decorative covering is a classic option for interior decoration of offices, corridors and high-traffic areas. The products have the relevant fire safety certificates of the Russian Federation (KM1) and also comply with the unified sanitary-epidemiological and hygienic requirements.

Elegant vinyl coverings from the market leader Newmor provide a modern stylish interior. Our catalog contains a choice of more than 500 choices of decoratings.

VIPROK-Vinyl panels are resistant to light, temperature changes and mold, which is especially appreciated in medical and children's institutions.

***VIPROK-Vinyl is officially included in the "Album of typical exterior and interior decoration of military infrastructure facilities."**

Scope of application

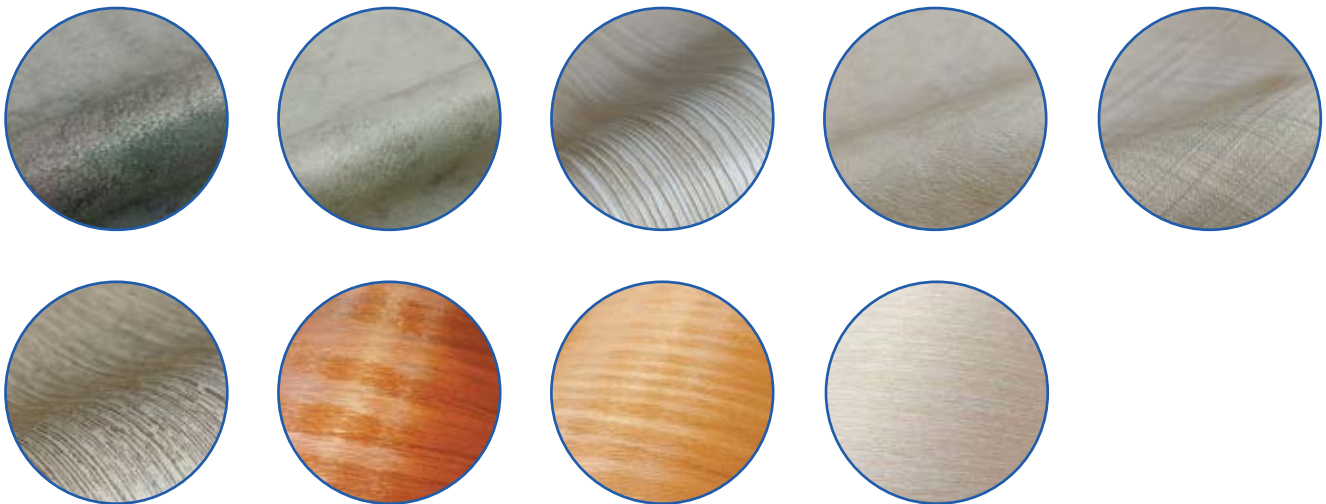

VIPROK-Vinyl panels are most often used: in hotels, office and administrative premises, medical institutions, premises of the Ministry of Defense*, restaurants and cafes, schools and kindergartens.

Basis: GB, MGO

VIPROK-PVC

PANELS WITH QUALITY RELIABLE PVC

Wear-resistant decorative wall panels based on high-quality PVC-coated gypsum board with a thickness of 0.12/ 0.14 / 0.15 / 0.18 / 0.25 mm.

VIPROK-PVC is the optimal combination of cost and wear resistance. Drywall is laminated on modern industrial equipment and comes through strict quality control. Resistant covering panels can last more than 15 years! Therefore panels with PVC film are primarily used for wall decoration in high-traffic areas: shops, offices, corridors.

More than 100 colors and decors of PVC make it possible to create an individual design of the room.

Simple clean installation allows you to complete the finishing work in the shortest possible time - the room is ready in 24 hours.

Scope of application

VIPROK-PVC panels are most often used: in office and administrative premises, cafes, medical and educational institutions.

Basis: GB, MGO

VIPROK-RAL

BUDGET PANELS WITH ACRYLIC COVERING

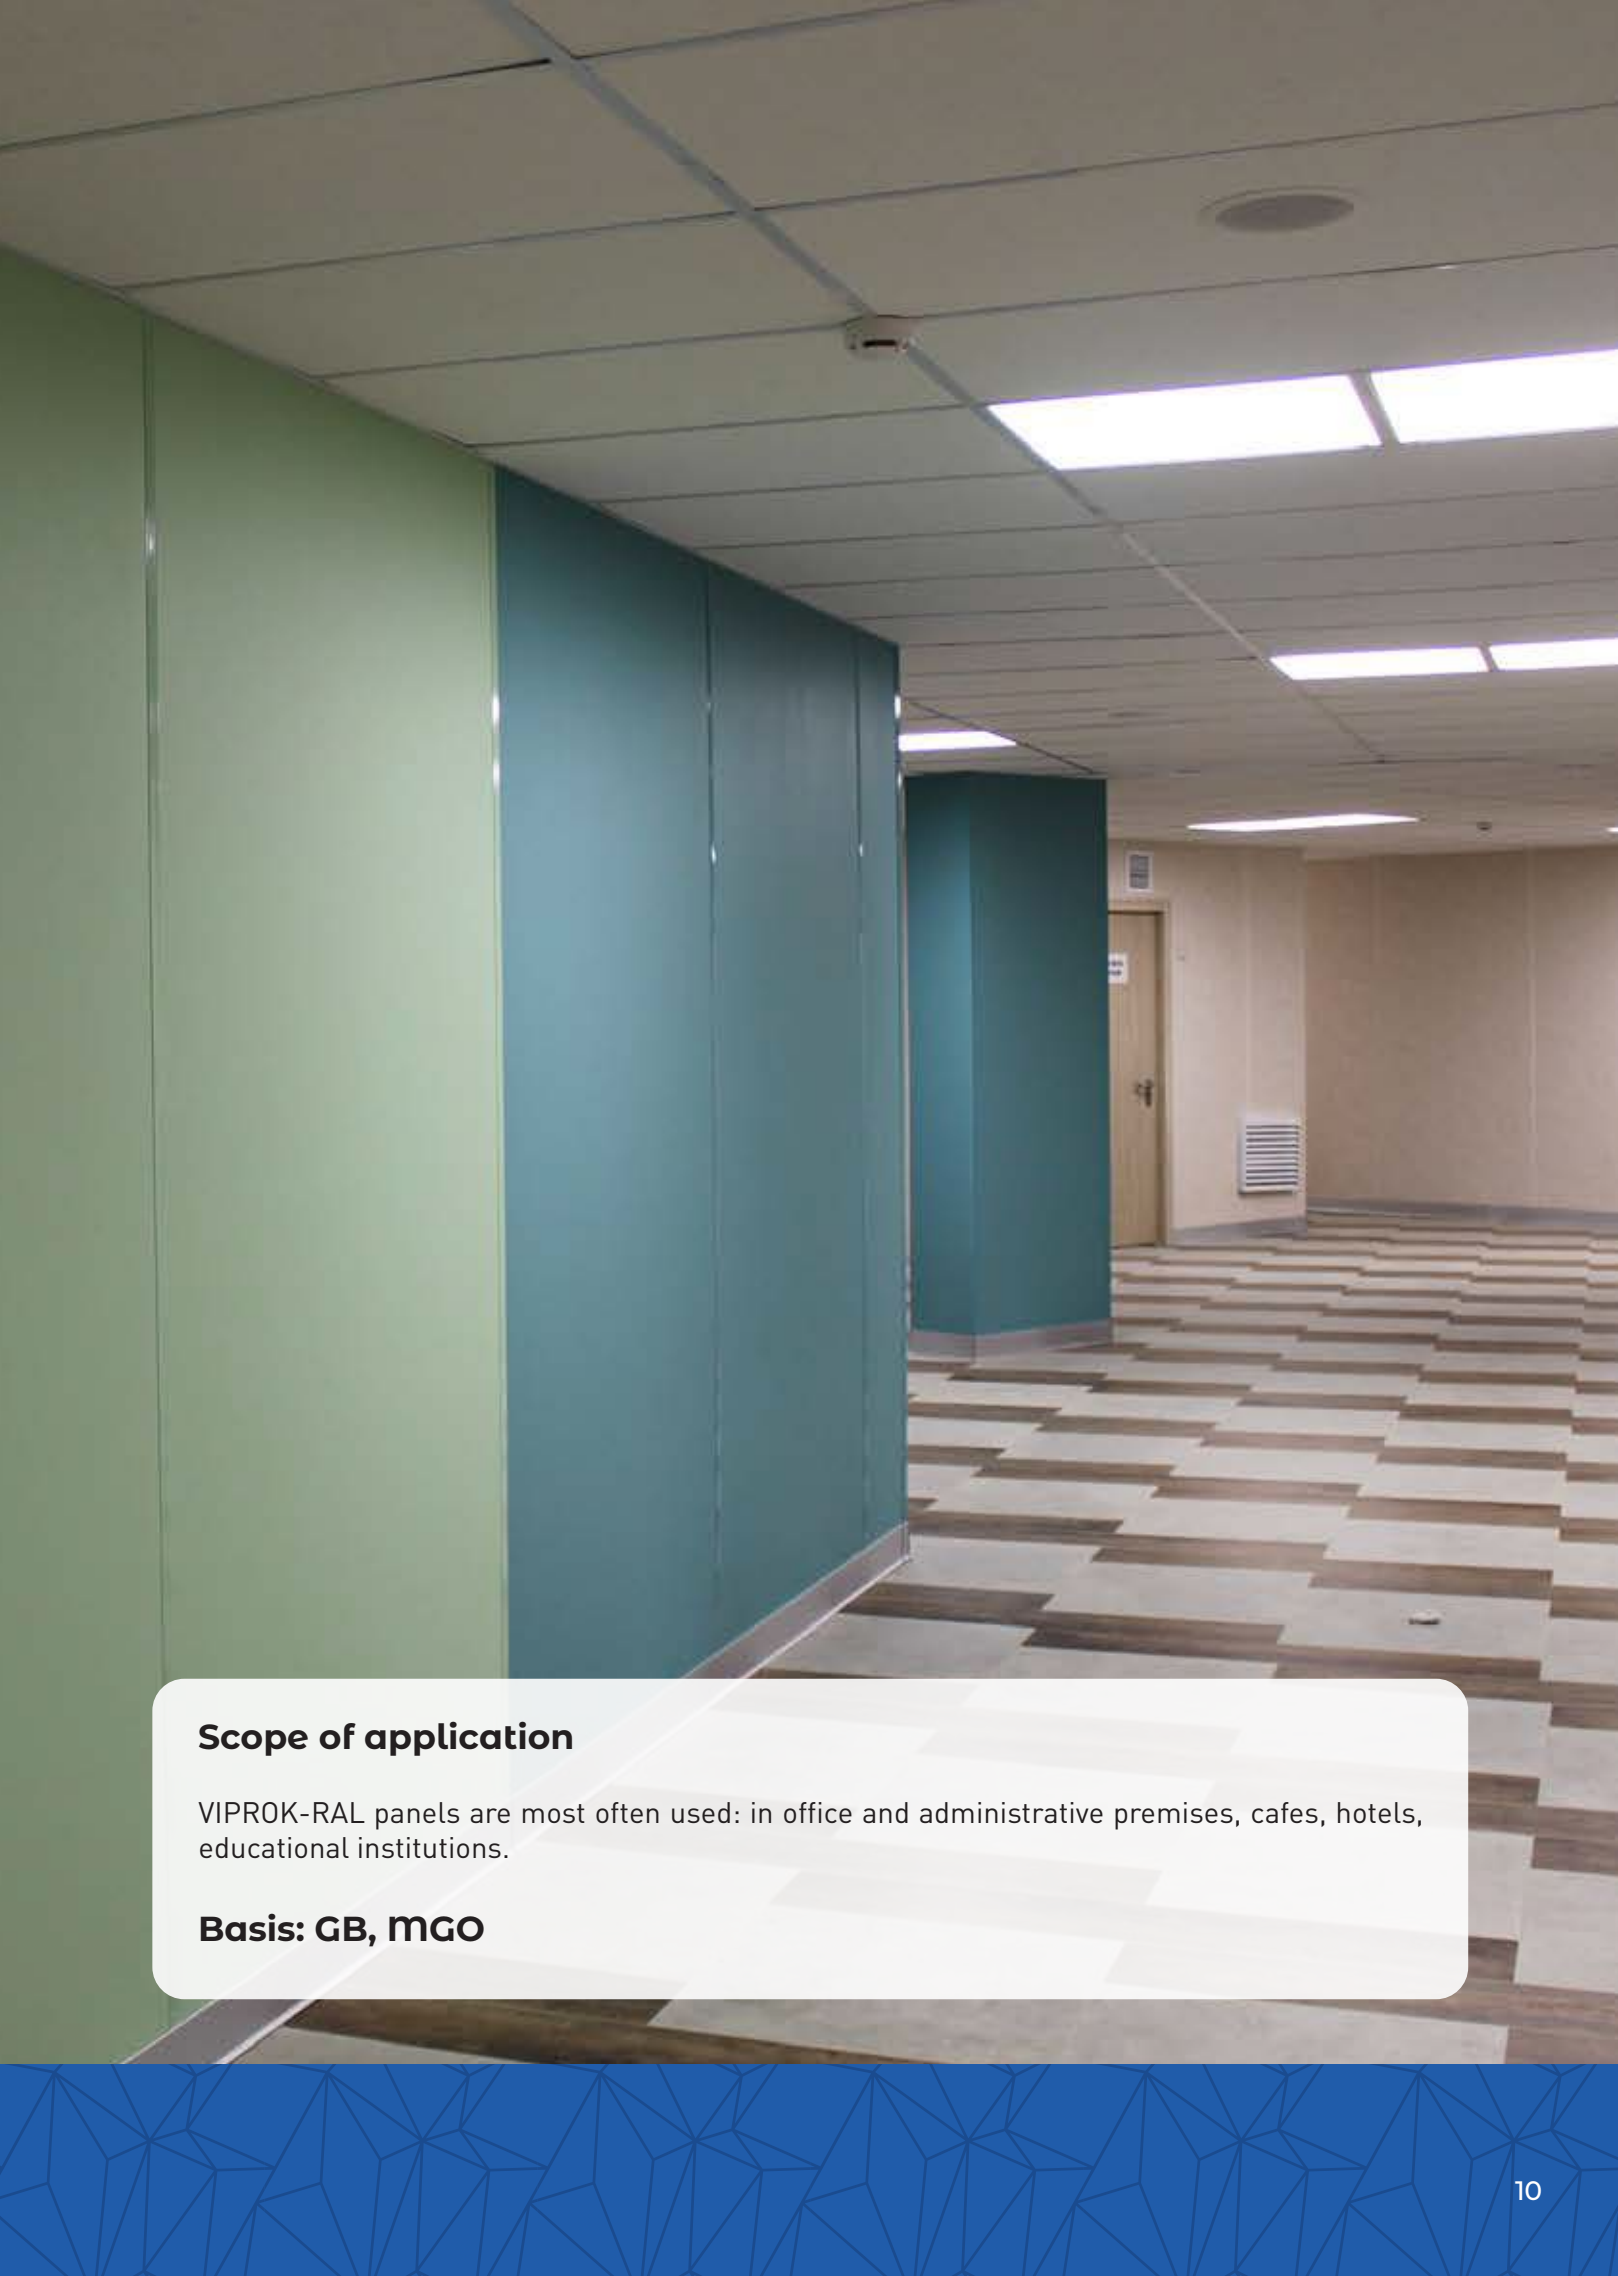

Decorative wall panels made on the basis of GB or MGO with a multi-layer acrylic covering which is reinforced with a layer of professional varnish.

VIPROK-RAL gypsum-acrylic panels resistant to external influences are an economical option for interior decoration of premises with high traffic. Branded acrylic covering and protective varnish make VIPROK-RAL the most durable decorative finishing material.

VIPROK-RAL have a wide range of colors (more than 500 shades). The use of reliable components from leading European paint and varnish manufacturers allows us to guarantee color saturation and depth for more than 15 years.

The main feature of VIPROK-RAL panels is their affordable price, subject to the highest quality control during production.

Scope of application

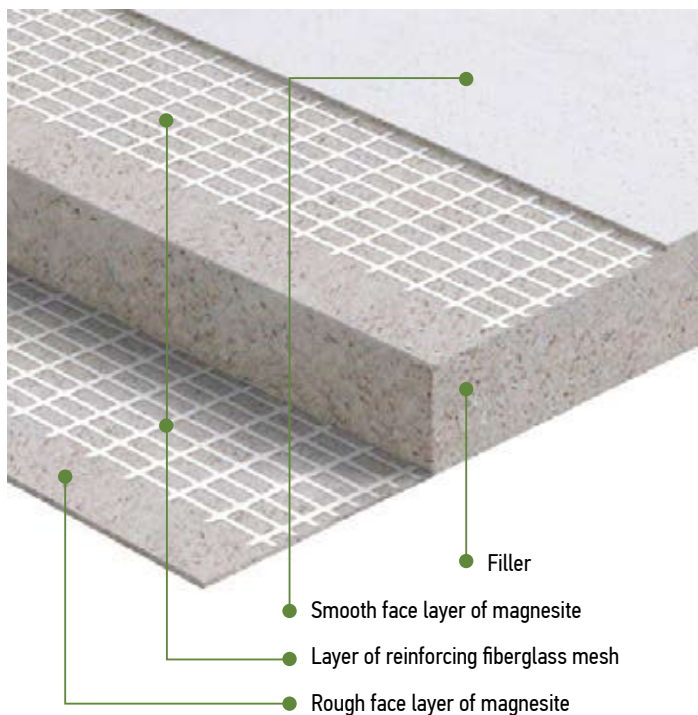

VIPROK-RAL panels are most often used: in office and administrative premises, cafes, hotels, educational institutions.

Basis: GB, MGO

VIPROK-NG

NON-FLAMMABLE PANELS ON THE BASE OF GMS

Non-combustible panels for interior wall decoration based on MGO with a multi-layer acrylic covering fixed with a high-strength protective varnish.

VIPROK-NG is based on fire-resistive MGO panels (glass-magnesium sheets), on which a durable branded acrylic covering is industrially applied. Such MGO panels are needed in rooms where increased attention to fire safety is required - these are evacuation routes, corridors, flights of stairs in high-rise buildings.

MGO panels meet the requirements of class KM0, fire safety in terms of combustibility, flammability, toxicity and fire resistance.

VIPROK-NG panels are resistant to mechanical stress, able to withstand temperature fluctuations ranging from -50 Co to +80 Co, are not subject to mold, fungal formations, fading during operation and are also resistant to ultraviolet exposure.

Scope of application

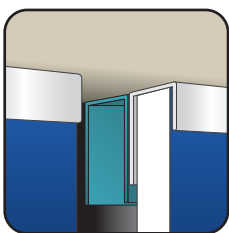

VIPROK-NG panels are most often used: in office and administrative premises, corridors, flights of stairs of multi-storey buildings and other premises with high fire safety requirements.

Base: MGO

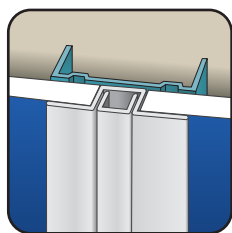

INSTALLATION TECHNOLOGY

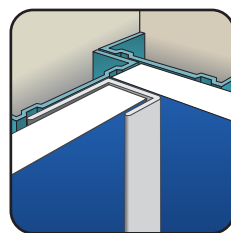

Fixing the panel to the ceiling through the L-profile

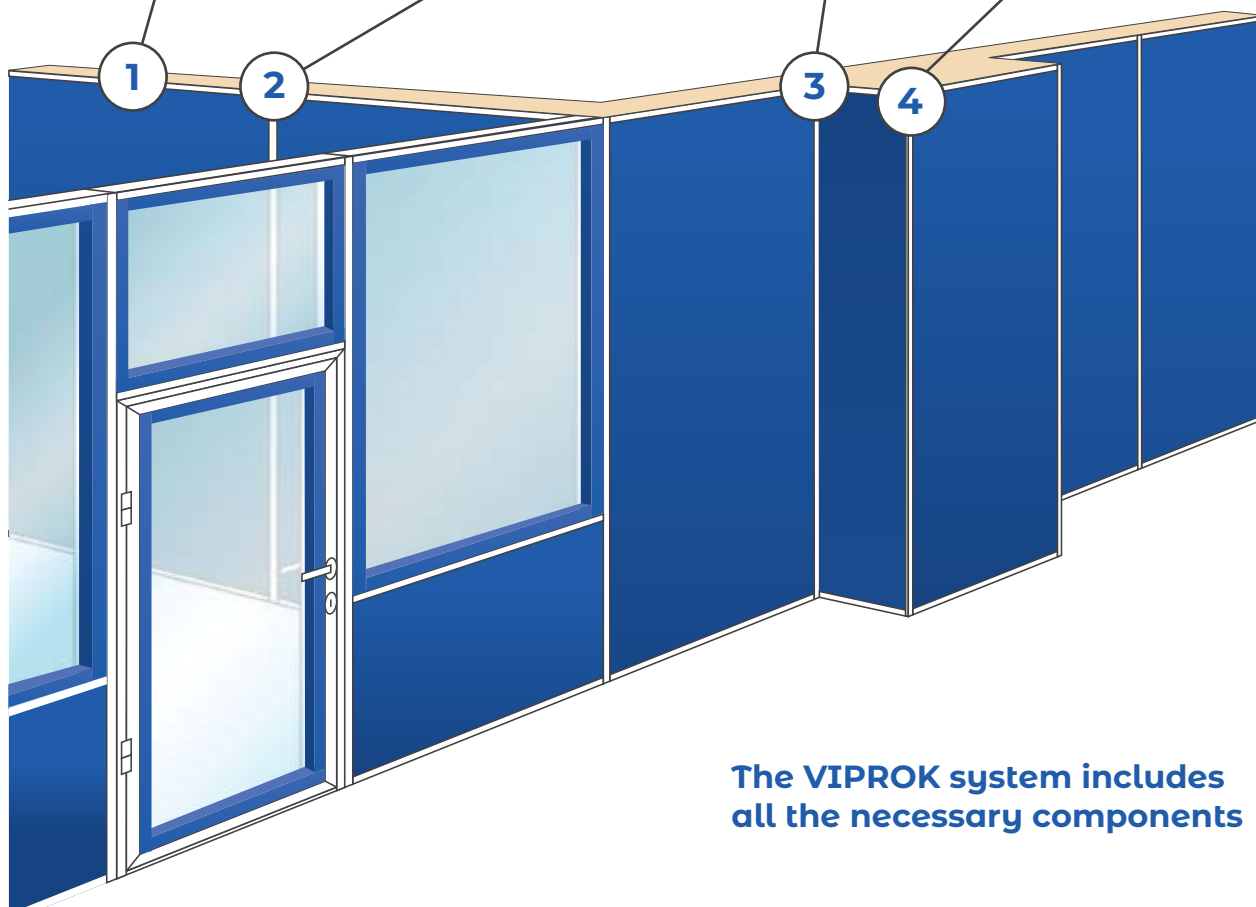

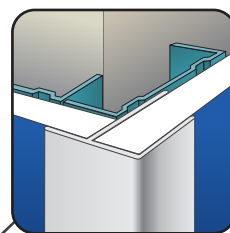

Vertical connection of panels using Ω -profile

Inner corner cladding with L-profile

External corner cladding with F-profile

The VIPROK system includes all the necessary components
